

Welcome to the Liquamelt™ experience, the next generation in adhesion technology.

Cool on Delivery - Hot on Demand

Liquid Polymer designs, manufactures and supplies a unique adhesive and delivery system that we directly support with research, marketing and technical service.

Liquamelt® offers an innovative alternative to conventional packaging and product assembly adhesive systems. Liquamelt® is the industry's first on-demand, green, cold, rapid set adhesive system for your demanding applications.

Liquamelt®, a room temperature liquid cold glue that is applied as a heated, foamed adhesive, reducing adhesive consumption by up to 50% when compared to conventional hot melt adhesives.

Liquamelt® is delivered in a closed system that eliminates contamination and charring. The result is a significant reduction in maintenance and repair parts. Your benefit is a direct reduction in downtime and repair costs

Reduced adhesive consumption

Reduced energy costs

Reduced maintenance and repair costs

Improved productivity with rapid cold start-up

Safer work environment with a single heat zone--no hot tanks or hoses

Green adhesive--more than 40% biobased content, 75% less energy usage
