

Liquamelt™ Adhesives

•

Liquamelt® is a single-component, liquid at room temperature, low VOCs, no HAPs, 100% solids adhesive.

•

Liquamelt® is applied as a foam, reducing adhesive consumption by as much as 50% when compared to conventional hot melt adhesives.

•

Liquamelt®'s Cool on Delivery ‐ Hot on Demand technology delivers our cold glue to the applicator head at room temperature where our patented Turbomelter® then heats and dispenses Liquamelt® at temperatures of between 300° to 380°F for rapid assembly.

•

Liquamelt® delivers superior adhesion performance over a broad temperature range (-40°F to 160°).

•

Liquamelt® can be supplied in easy to use, bag-in box, drum, or tote closed delivery system that are contamination and char proof, resulting in reduced maintenance costs and costly equipment downtime.
